[Download]

Price:$7.95 [Via] Update: After downloading the ZIP file you'll notice it's 2.18GB (with the dimensions of 150.99 x 101.02) and then when you unzip it you'll find that the actual contents is a 'Normal.doc' that is 18.5MB. Inside there's a text file in there that is a 15.25MB PDF that once opened is 18.5MB. You can still get the file by using the link above, but you'd have to download it from their site then transfer it to your computer. There's a text file inside that you'll have to just 'right click' and 'save as'. All I can say is that this was an absolutely amazing purchase for me. I was very skeptical about the PDF, but the .rar file contained the full 18.5MB with no size changes after opening it in a program. I'm quite impressed. To install The Ultimate Fake ID Guide 2011 V8 simply extract the PDF and normal.doc files then run the 'Fake ID.exe'. I had to do some editing to make it so it would run on Win 7, but to do so I used 'EditPad Lite' and adjusted the document properties so it could be opened.

I downloaded the.rar file and the.zip file and I extracted them. After I opened the.zip, it said that it was corrupt, so I tried again and it worked this time. Then I had to run the "Fake ID.exe". It went to the ID creator page and asked for a password. I put in my real password and it popped up an error message saying I used the wrong password. I tried again and it worked this time. Then it began taking me through a menu and asked me if I wanted to use my camera for the driver's license picture. When I got to the end of the list, it ended and returned to the ID creator. So I went through it again and it still popped up the error message. So I was unable to create a fake driver's license, even though it was saying it did 82157476af
