Using this piece of code, your dll's bitness will be the same as the target application. A: I am trying to find a library in C# for Vectorize (Binary EXE/DLL) This question is old but the solution to your problem is much simpler than what you've mentioned in the question. If the OP was looking for an API to load and save binary EXE/DLL files then look at SharpDevelop.NET. You can also use EPPlus.Core for reading and writing files. You can also look at Microsoft's documentation at the link below. It is a very good and complete documentation about their vectors graphics functionality. Further references the foregoing, the petition for rehearing by the panel and the suggestion for rehearing en banc is hereby DENIED. 1 The court stated: Defendant is now serving a sentence for the crime of robbery in the first degree on a conviction of the use of a deadly weapon. As a result of a second, subsequent, robbery conviction, defendant is presently serving a consecutive sentence of 10 to 25 years. Although the defendant in the instant case was charged and tried as a second offender, the state did not plead and prove that he was a second offender. The state introduced a certified copy of the prior conviction of the defendant in the second degree robbery which was later set aside upon a finding of violation of the defendant's right to counsel. Thus, as in Clutchette, defendant was not adjudicated as a second offender by a trial court on the record. We find this to be an important distinction from Clutchette, since the conviction and sentence for the crime of second degree robbery in Clutchette was on the record and the trial court had given prior notice of its intent to impose the maximum sentence on the conviction. In Clutchette, the defendant was sentenced to life imprisonment. The Court's opinion in Clutchette clearly stated that it was not intended to reach the validity of the imposition of the maximum sentence when it said: However, even if a sentence of life imprisonment for the crime of armed robbery were permissible in view of our holding, it would seem to be an abuse of discretion to impose such a sentence in this case where the defendant was sixteen years old when 82157476af
